ACME SOLUTIONS

A modern forest for a modern world

Environment Impact Assessment Report (IM5)

Site description (location, size, habitats etc)

Light readings – how would the proposal change these? What impacts would any changes have?

Moisture readings – how would the proposal change these? What impacts would any changes have?

Plant species found living on the trees

Animal species found living on the trees and in the leaf litter

DISCOVER

ACME SOLUTIONS

A modern forest for a modern world

Benefits associated with leaves on the trees (if any):

Benefits of the branches and trunks (if any):

Benefits of the roots (if any):

Benefits of dead leaves, twigs, nuts, berries and all the other messy stuff on the floor (if any):

Any other reasons that natural trees may have hidden benefits over concrete trees or 'things' that might be adversely affected:
